

String Rack

- ♪ The String Rack is for the adventurous guitarist who wants to expand the sounds of the 12 string guitar.
- ♪ Simply position a String Rack under the strings and find a tuning.
- ♪ Now a “side harp” can be added to your composition

Notes behind the String Rack

- The area behind the String Rack is another place for the string to vibrate. Depending on where the String Rack is positioned, any interval can be formed.
- Align the edge of the Interval Guide with each fret. The dashed lines indicate where to place the center of a String Rack.

*Interval guide based on a 25.5 scale length
